MaximumMarks	2Marks

Question-1:

- 1.Create Usertablewith userwithemail,Username,rollnumber,password.
- 2.PerformUPDATE,DELETEQuerieswithusertable.
- 3.Connectpythoncodetodb2
- 4 . Create a flask app with registration page. login page and welcome page. By default load the registration page once the user enters all the fields store the data in database and navigate to login pageauthenticateuserusernameandpassword.Iftheuserisvalidshowthewelcomepage.

The screenshot shows a web browser window with a single tab titled 'Signup'. The address bar displays '127.0.0.1:5000'. The main content area features a white rounded rectangle centered on a light gray background. Inside this rectangle, the word 'SignUp' is written in a large, bold, orange font at the top. Below it, there are four text input fields, each preceded by a label: 'Username :', 'Roll Number :', 'Email :', and 'Password :'. At the bottom of the form is an orange button with the text 'Signin' in white. Below the button, there is a line of text: 'Already have an Account ? [Signin](#)'.
